DRYMark®

Self-Stick, Dry Erase Board Resurfacing Film

DRYMark Dry Erase Resurfacing Film Products are an inexpensive, high quality replacement for today's worn or soiled dry erase whiteboards and chalkboards. DRYMark film products are eco friendly, eliminate the need for high cost board replacement and the associated cost of delivery, set-up, disposal and recycling of the old boards.

- DRYMark Dry Erase Resurfacing Film eliminates the cost of repeated whiteboard replacement forever.
- Eco Friendly... designed for resurfacing chalkboards and eliminating the hazardous impact of chalk dust.
- DRYMark costs far less than installing new whiteboards and on average lasts years longer.
- Unique self-stick film rolls are easy to install and stay put until you want them removed.
- DRYMark's DuraWhite™ surface is guaranteed for 7 years and outlasts just about any standard melamine whiteboard.

DRYMark Dry Erase Whiteboard Film Products are easy to install and maintain. They are available in several popular board sizes or can be ordered and cut to fit any custom size board.

Once installed DRYMark's guaranteed DuraWhite surface will last for years even under heavy use. End result... you will never need to replace your worn or soiled white, green or black boards again.

DRYMark's "NO GLUE" self-stick process uses an easy to identify pressure sensitive surface using a unique blue release liner.

DRYMark's application process takes little time to complete and results in a high quality, long lasting NEW dry erase surface.

DRYMark Board Resurfacing Films are the smart alternative to replacing just about any worn, soiled or damaged whiteboard or chalkboard surface. DRYMark's DuraWhite surface delivers years of high quality, low cost service at a fraction of the price of new boards and has an added advantage of being environmentally friendly.
