

NOW THERE'S A  
STRONGER WAY TO GO GREEN

Equipment & Supply Co.

## Linear Low Density (LLDPE)

# EarthWise™ *Degradable*

Olmsted-Kirk's EarthWise LLDPE liners contain a special oxo-biodegradable additive that stimulates photodegradation (UV) and oxidation to reduce the molecular weight of the plastic film. When exposed to UV light, heat and oxygen, this two-step process breaks down the plastic into small fragments, which are then able to degrade.

With Olmsted-Kirk's EarthWise liners there's no need to choose between your performance and environmental goals. Features like these help you achieve both:

- Meets ASTM D5510- Heat Aging of Oxidatively Degradable Plastics.
- Meets ASTM D5208- Fluorescent Ultraviolet Exposure of Photo-degradable Plastics.
- Ideal for heavy duty applications, including sharp, heavy and irregular waste.
- Exceptional strength with good puncture and tear resistance.
- Seamless tubular construction maximizes overall integrity.
- Star-seal bottom eliminates seam failure and prevents leaks.
- Coreless rolls for ease of use and storage.

Introducing Olmsted-Kirk's EarthWise™ degradable trash can liners—versatile, cost-effective performers that are better for you, better for the environment. Available in both linear low density and high density resins, these liners deliver the tough performance, plus important “green” advantages that make them a smart choice for environmental sustainability.

### EarthWise™—Degradable Linear Low Density (LLDPE) Liners

ITEM #	GALLONS	COLOR	PACK ROLL/BAGS	CASE COUNT	NET POLY WT./ LBS.
 OKEW-LD2424-G	7	Green	10/100	1000	13.2
 OKEW-LD2433-G	10	Green	10/50	500	11.1
 OKEW-LD3340-G	33	Green	6/25	150	10.9
 OKEW-LD4048-G	40-45	Green	5/20	100	11.0
 OKEW-LD3860-G	60	Green	5/20	100	18.7
